Experience

01/21 - University of Wisconsin - Madison, Research Assistant, Madison, WI.

Present Advisor: Josiah P. Hanna

- o My research focuses on improving the data efficiency of reinforcement learning (RL) by controlling the distribution of data from which an RL agent learns.
- o Identified aspects of data augmentation that improve the data efficiency of RL and successfully applied these insights to a real-world robotics task.
- o Demonstrated that on-policy policy gradient algorithms are more data efficient with adaptive, off-policy sampling than on-policy sampling.
- 05/21 **Sandia National Laboratories**, *Research Intern*, Albuquerque, NM.
 - 11/23 Advisor: Drew Levin
 - Deep reinforcement learning for power systems management.
 - From May 2022 Nov 2023, I served as a consultant for reinforcement learning projects.
- 09/19 University of Wisconsin Madison, Research Assistant, Madison, WI.
 - 09/20 Advisor: Jignesh Patel
 - o Built the query execution and storage engines of Hustle, a scalable data platform built on top of Apache Arrow.
 - Designed a variant of the Lookahead Information Passing (LIP) query execution strategy with improved robustness in dynamic data environments for Hustle. [github]

- 10/16 **University of Pittsburgh**, Research Assistant, Pittsburgh, PA.
 - 08/19 Advisor: Vladimir Savinov
 - \circ Designed and optimized the first search for new hadronic W_{bJ} states in data collected by the Belle experiment. [thesis]
 - Created tools to monitor TOP Level-1 trigger performance for the Belle-II experiment.
